

# How to get 90+ percentile in ELITMUS!!!

---

**Sunday, January 26, 2014**

This post is for you guys... On your "Never Ending" queries regarding Calculating Overall Percentile.... I heard Elitmus has now a days stopped providing "Overall Percentile" and i can see why that happened... But before i proceed with this post... below are the links of my previous three posts, so that you can get the idea.... **What i am talking about in this post... :D**

**So lets begin... But first thing first.**

**\*\*\* This Post is to help you in "Estimating Overall Percentile"... It "Doesn't Guarantee" that the "Estimation will be 100% accurate. I don't know any Solid Formula to calculate percentile, its all Observation/Experience. So please avoid taking any "Load" faltu mai...!!!**

Hmm.. having said that... here we go :)

*A rough idea about Sectional Percentile:*

*Quant;*

- *0 marks --- 40 percentile*
- *Up-to 10 Marks(1 correct question) --- 50+ percentile*
- *Up-to 20 Marks(2 correct question) --- 60+ percentile*
- *Up-to 30 Marks(3 correct question) --- 75+ percentile*
- *30+ marks --- 80-85+ percentile*

*See....this is why i Emphasis on "Attempting Less But with Accuracy" :)*

*Reasoning:*

- *Up-to 20 Marks(2 correct question) --- 40+ percentile*
- *Up-to 30 Marks(3 correct question) --- 50+ percentile*

- *Up-to 40 Marks(4 correct question) --- 65+ percentile*
- *Up-to 50 Marks(5 correct question) --- 80+ percentile*
- *50+ Marks --- 85+ percentile*

*Verbal:*

- *Up-to 20 Marks(2 correct question) --- 20+ percentile*
- *Up-to 60 Marks(6 correct question) --- 60+ percentile*
- *Up-to 90 Marks(9 correct question) --- 85+ percentile*
- *Up-to 100 marks --- 90+ percentile*
- *120+ marks --- 96+ percentile*

**Now Calculating "Overall Percentile".... umm sorry... "Estimating Overall Percentile" :)**

**Some sectional percentile combination which will give you idea about estimating overall percentile.**

- **Quant 50 + Reasoning 85 + Verbal 95 == 90+ overall percentile**
- **Quant 30 + Reasoning 70 + Verbal 95 == 80+ overall percentile**
- **Quant 80 + Reasoning 80 + Verbal 90 == 95+ overall percentile**
- **Quant 60 + Reasoning 80 + Verbal 90 == 85+ overall percentile**

**You can observe that "weightage of Sectional Score in Overall percentile" is as: *Quant > Reasoning > Verbal***

Now Please.... Don't start asking question like... *"How come X after getting A,B,C sectional score has his/her percentile Greater than me when mine score is Nearly Equal/Equal/Greater than him/her????"*

I think this is the REASON, why Elitmus has Stopped giving Over all Percentile. They got their "Algorithm" their "Method"..... Whatever it may be... and However it may work..... BUT its upto them....!!! All you guys can focus on is Scoring As high as Possible. Hope this suffices your queries. I will encourage you guys to "Get those guys, who got their Overall Percentile(who gave elitmus when, elitmus used to provide overall percentile) and Post it in Comments"... so that you will have more Examples to compare your percentile. :)

For any queries... Please Refer to **Frequently Asked Question(FAQ'S)** <sup>[1]</sup> before posting

comments.

Best Wishes :)(:
